LC-39 POWER OUTAGE TEST: At 1730 hrs on Thursday, October 9, there will be a major power outage affecting the LC-39 area. All LC-39 facilities between the Booster ARF on Schwartz Road on the south up to the Playalinda Road and the Merritt Island National Wildlife Center on SR 406 to the north are affected and will completely lose power for up to 15 minutes. **The Industrial area and CCAFS are not affected by the test.** FPL power will be disconnected from the C-5 substation on Kennedy Parkway for the purpose of verifying that emergency generation systems will activate "life safety" systems as required by OSHA safety standards. Life safety systems are certain light circuits within the LCC, VAB, OPF's and Pads essential to safe evacuation of personnel. Emergency power to critical launch systems will be verified as well. The duration of the outage should be 15 minutes at which time FPL power will be reconnected to the C-5 substation and all power restored to normal. Systems on Uninterruptible Power Systems (UPS) or on generators will be unaffected by the test. Only critical circuits in the LCC, OPF, TPSF, Pads A&B and VABR are supported by the emergency generators at the C-5 plant. **All other facilities in LC-39 will lose power for 15 minutes and should shut down vulnerable systems prior to the test.** In preparation for the test, computers or critical equipment that could be damaged or lose data should be secured by 1700 hrs. All elevators will be parked on ground floors and locked out. All personnel not directly involved with the test will be required to clear upper floors in buildings and gather outside or in ground floor rooms with windows and daylight. There will be several PA announcements made on first and second shifts to remind personnel of the test and allow them time to prepare. In the event the test is postponed for weather or operational needs, it will be rescheduled to the following day, October 10, at the same time of day. Your facility managers have been involved in the planning for this test and can address any concerns you may have. Point of contact: <mailto:Stephen.J.Payne@nasa.gov>. (PH-M1)

NUTRITION TIP FROM THE KSC FITNESS CENTER: DE-SUPERSIZE YOUR MEALS. Oversized food portions are so common in the United States that what once seemed like a megaportion now looks normal to us. At many fast food and family-style restaurants, a portion equals two to eight standard-size servings. Fast-food chains offer portions that are two to five times larger than those originally introduced. Portions served in the home are increasing as well. Getting used to seeing smaller portions should help. At home, serve yourself a quarter less of everything than usual. Emphasize to yourself that this amount is not the limit, but a starter portion. Other ways to control portion size include purchasing small-size bags of snacks or pouring a small amount into a bowl, or use smaller plates. Starting a meal with salad or broth-based soup should also make it easier for small portions of other foods to satisfy you. **HIGH-CALORIE MEGAPORTIONS.** The real problem we face, however, is not excessive portions of all foods. It's excessive portions of foods high in calories. Most of us eat too few vegetables and fruits that are low in calories and high in nutrients. For many people, the key to balance and portion control may be to first serve a substantial portion of vegetables and fruit - maybe double their usual amount - and then serve other foods in smaller-than-usual portions. To satisfy hunger for several hours, we need protein in a meal (from meat, dairy or plant sources like beans), but there's no reason to make it the star. INSPECTOR GENERAL: The Office of Criminal Investigations (OCI) is the investigative arm of the NASA Inspector General (IG). The OCI is an independent entity and reports directly to Robert Cobb, the NASA IG, in Washington D.C. The primary mission of this component is to conduct criminal and civil investigations of reported or suspected fraudulent acts by employees, contractors, and others relating to the administration of NASA contracts and programs. Although emphasis is placed on major procurement fraud, (particularly allegations of defective/substandard parts, mischarging, kickbacks, bid rigging, and research fraud), investigations are also conducted of theft, conflict of interest, environmental and hazardous waste violations, health care fraud, and computer related crimes. OCI also provides fraud briefings for Government and contractor employees that are designed to highlight potential risks concerning fraud and related matters. Suspected violations can be reported by calling 867-4714 locally, the toll free Hotline at 1-800-424-9183, or by writing NASA Inspector General, P. O. Box 23089, L'Enfant Plaza Station, Washington, D.C. 20024. The OIG Cyber-Hotline can be accessed at www.hq.nasa.gov/office/oig/hq. (OIG)

FEDERAL EMPLOYEE WORK-RELATED INJURY: Federal employees are reminded that they are responsible for notifying their supervisors and seeking first-aid care from the KSC Occupational Health Facility for any injury which occurs on the job. For more information, contact Jeanine Meister at 867-8229. (TA-C2)

FEDERAL EMPLOYEES HEALTH BENEFITS EXTENSION OF COVERAGE: The Federal Employees Health Benefits Amendments Act (PL 100-654) has provided separated employees, certain dependent children, and former spouses the option of keeping their Federal Employees Health Benefits (FEHB) plan for specific periods of time. Under the provisions, employees who leave the Government, either voluntarily or involuntarily, are eligible to continue FEHB coverage for 18 months if (1) the employee was enrolled in the FEHB at time of separation; and, (2) the employee was NOT fired because of "gross misconduct." This includes employees who retire and are not eligible to continue FEHB coverage as annuitants. Children who become age 22 and ex-spouses may continue coverage for up to 36 months provided they had coverage under a Federal employee at the time of the event. These individuals have continuation of coverage for 31 days at no cost to them. However, within 60 days of the event, they must submit paperwork to continue their FEHB. For more information, contact Kathleen Ellis at 867-2002 or Lisa Fowler at 867-1883. (BA-B)

EMPLOYEES PLANNING FOR RETIREMENT: To make tentative annuity computations, verify creditable service, and process an application for retirement, employees considering retirement should assure that all military and civilian service has been properly documented in their personnel records. Although dates of military service may have been previously recorded and verified, these dates should be reverified so there will be no delay in the receipt of annuity checks. Employees who have had active military service should submit to Kathleen Ellis or Lisa Fowler, Retirement Counselors, Personnel Office Benefits Team (BA-B), copies of their military discharge papers, DD 214, or other documents showing the beginning and ending dates of active service. Employees who do not ensure that all active duty military service is properly documented may experience a delay in the receipt of full annuity payments from OPM upon retirement from civil service. Contact Kathleen Ellis at 867-2002 or Lisa Fowler at 867-1883, Headquarters, Room 2506. (BA-B)
